

# Start Family

## The Options are Endless!

Complex solutions do not have to be complicated. Behind the diversity of the Start generation wheelchairs is a sophisticated concept whose strength lies in its simplicity. Otto Bock, with its Start series, has now introduced modular design into the area of standard adaptive wheelchairs.

The Start family offers adaptability and functionality with easy to fit options, like elevating legrests, stump supports, height adjustable push handles and a variety of armrest options. Seat depth, seat height and backrest height can all be adjusted to ensure comfort and support. With a full range of sizes for both children and adults, it has never been so easy to adapt a standard wheelchair to meet individual needs.

## Start M6 Junior

The Start M6 Junior is the first lightweight children's wheelchair that features the same modules and accessories as the adult variants. The Start M6 Junior is highly adaptable to small bodies and has a seat width starting at 28 cm. It offers secure mastering of obstacles as well as bright, child-friendly colours.
