

## MAXI MOVE

A MOBILE LIFTER FOR BUSY  
CARE ENVIRONMENTS

**Maxi Move™**, the most complete mobile lifter system available, is a proven success in care environments around the world. ArjoHuntleigh has now enhanced the *Maxi Move* to make it an even greater asset for care settings of all types.

The fundamental aim of *Maxi Move* is to be “best on basics”. Using *Maxi Move* you gain a safer, more efficient solution for the basic tasks of resident handling – lifting and repositioning.

The system offers two unique features – SVS (Stable Vertical System) and Powered DPS (Dynamic Positioning System), which together provide the safest, most comfortable basis for complete transfers – from the initial lift through to effortless fine-tuning of the resident’s posture.

This battery-powered passive sling lifter allows a single carer to safely manage a wide range of patient handling routines. With unrivalled flexibility, stability and reliability, *Maxi Move* is the best-equipped lifter for intensive use in busy care environments.

...with people in mind

# FLEXIBILITY FOR THE DIVERSE CHALLENGES OF EVERYDAY CARE

There is no such thing as a typical patient or a typical care facility. That is why *Maxi Move* has been designed as a complete system with the flexibility to provide patient-specific solutions in any care environment.

An optimum solution for supine lifting of patients in acute care...

...rehabilitation sessions using the unique Walking jacket...

...or for repositioning and turning patients in bed.

Good stability is fundamental for safe operation of the lifter and the patient's sense of security during transfers. *Maxi Move* is based on a vertical lifting principle that assures excellent stability – SVS (Stable Vertical System).

A safe and easy way to position patients in bed...

...transfer patients to chairs...

...or lift supine patients on stretchers.

**1 Scale**  
Built-in electronic scale shows resident's weight on the display of hand control.

**2 Combi Attachment**  
The Combi attachment enables easy interchanging between spreader bars and stretchers.

**3 DPS and Power DPS**  
DPS (Dynamic Power System) and Power DPS minimises manual handling and improves precision.

**4 Handset with screen**  
User friendly hand control with a colored and illuminated screen.

## Accessories
