

BodyAdjust

Sleep System by **MULTIWAY**

MULTIWAY is an Australian-owned company that prides itself on providing quality imported products at competitive prices.

As an Occupational Therapist or Clinician working with degenerative conditions, you understand that operating traditional hospital beds is not possible for some clients.

We work closely with healthcare clinicians, equipment providers, prescribers and end-users, to identify the latest technologies and changing needs of the market and our clients.

As specialists in sleep systems, we believe that a bed is an important aspect of our daily care. It is a place where rest and recovery should be comfortable, therapeutic and secure.

The BodyAdjust Sleep System is designed to blend into the home environment with ease, yet not compromise on your therapeutic needs. Multiple positioning options will assist you with the independent mobility, improve sleep quality, and comfort levels.
